## 18-05-2006: Telekom signs MoU with DreamSecurity for wireless communications

Telekom Malaysia Bhd's subsidiary Telekom Applied Business Sdn Bhd (TAB) has signed a memorandum of understanding (MoU) with DreamSecurity Co Ltd of South Korea to develop and market online and wireless telecommunications network and security in Malaysia and other markets.

Telekom Malaysia in a statement on May 18 said both parties would work to develop, implement and introduce the wireless secure socket layer (WSSL) and wireless public key infrastructure (Wireless PKI), which are relatively new in the Malaysian market.

It said the secured internet portal that subscribes to WSSL and WPKI can offer secured internet services that cater for both the wired and wireless internet environment thus capitalising the huge nine million internet users and 18 million mobile subscribers.

Both parties would also jointly- market E-Security products to domestic, Telekom Malaysia's overseas ventures and Organisation of the Islamic Conference countries.

DreamSecurity is an established Korean company with track record in the Korean security market. Its core technologies are in the public key infrastructure for the wired line and wireless network.
